

## *Unit 4*

# **USING MOUSE AND KEYBOARD TO USE APPLICATION SOFTWARE**

# APPLICATION SOFTWARE

- Application software refers to programs designed to perform specific tasks for users
- Application software is mainly divided into two parts. They are;
  - General Purpose Application Software
  - Special Purpose Application Software

## EXAMPLES FOR TASKS THAT CAN BE DONE BY A COMPUTER:

Watching a video

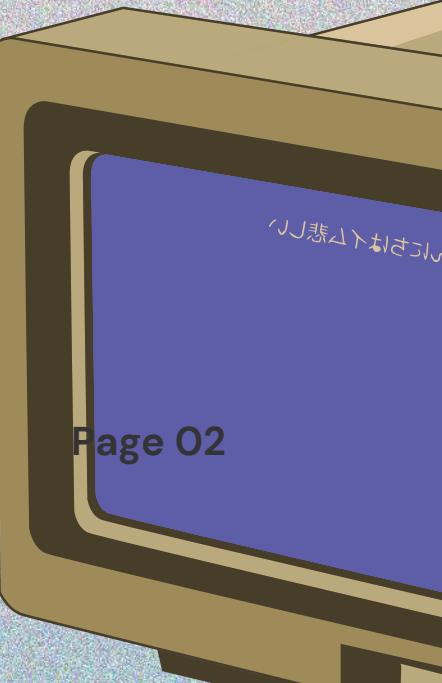

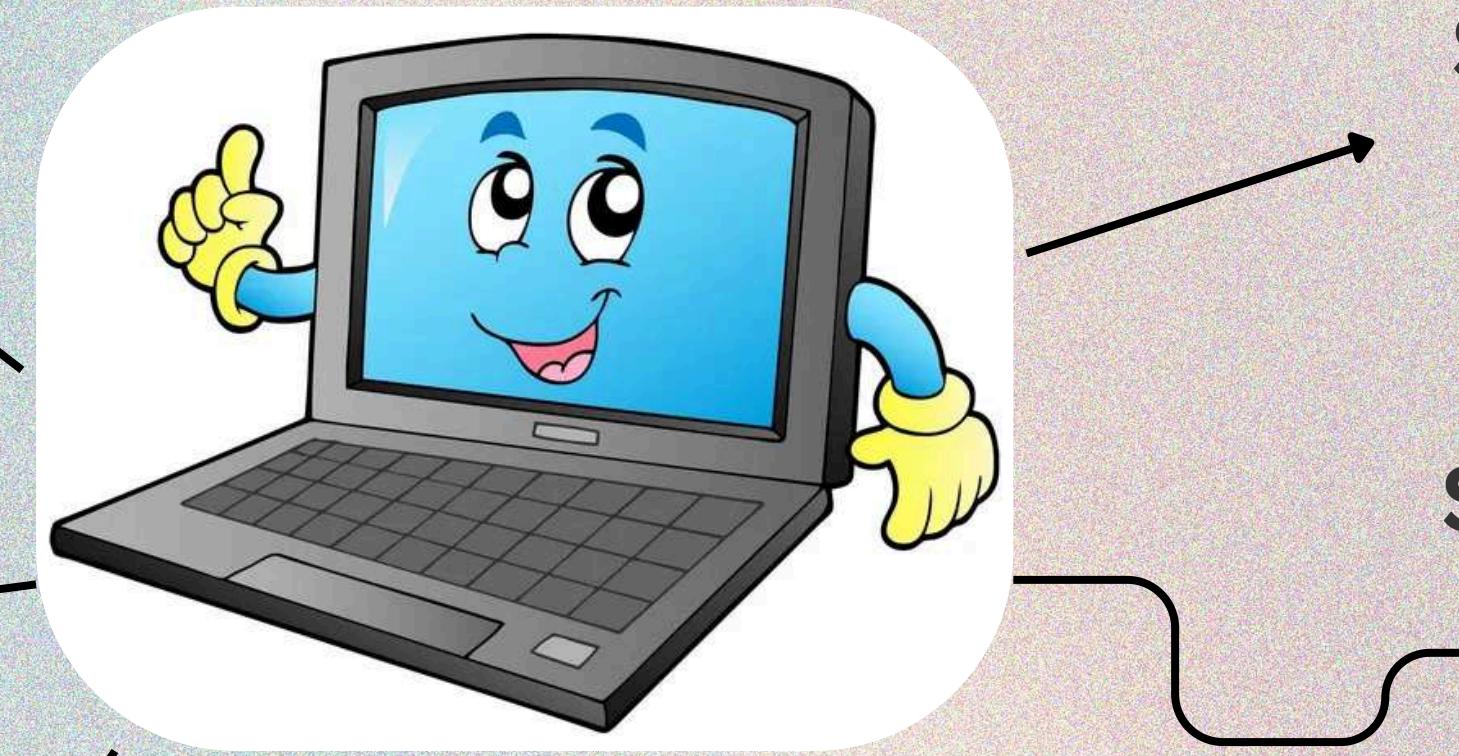

Sending e-mails

Computer Games

Searching information in  
internet

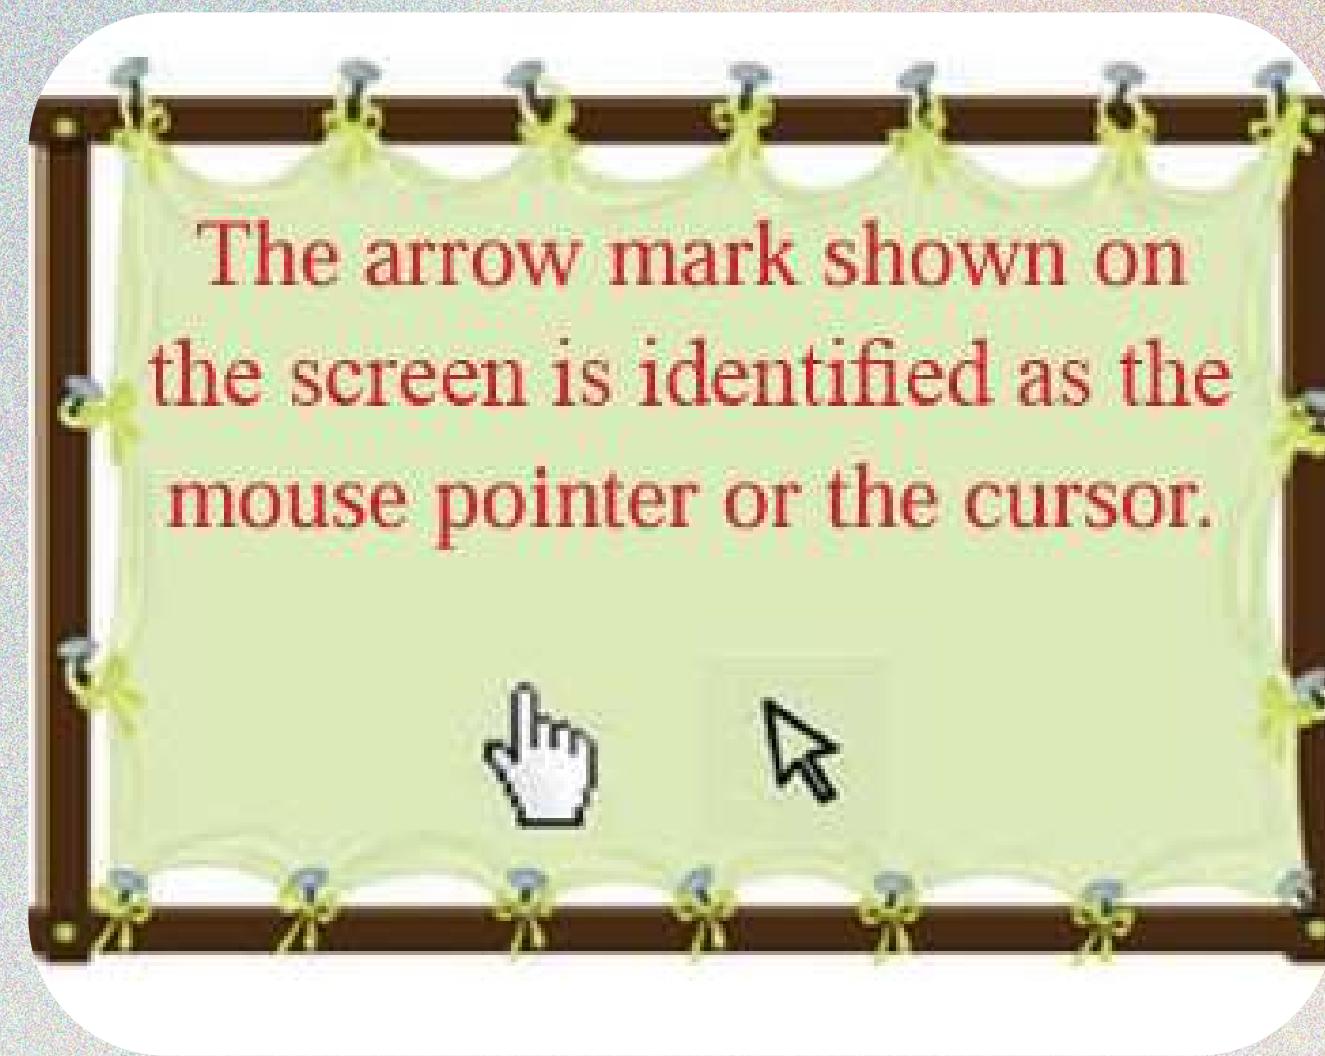

Preparing documents  
(letters, reports, lesson notes, etc.)

Editing pictures

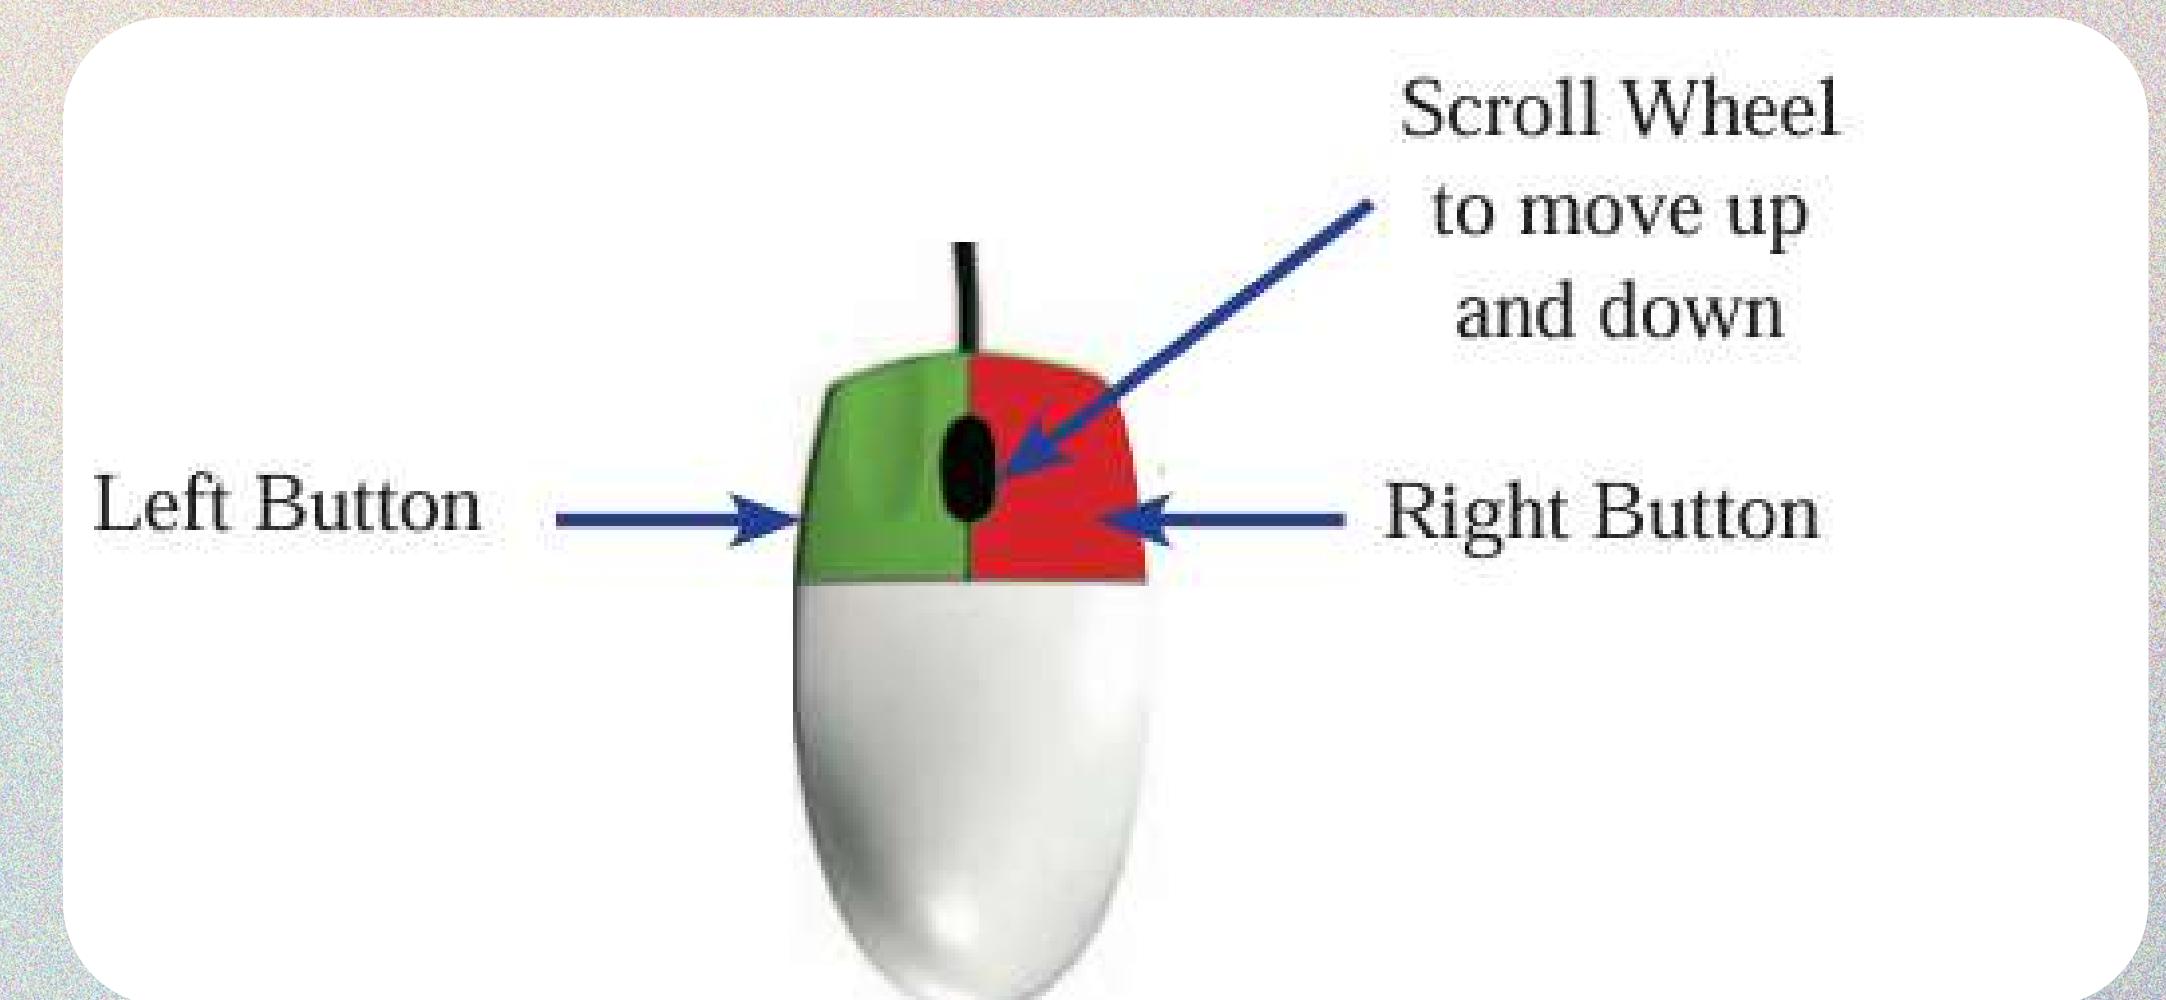

# *Using the Mouse*

- Controlling the pointer on the screen can be done by moving the mouse. Also, **opening a file, folder, menu** and **selecting commands** can be done by clicking the buttons on the mouse.

- Normally, the mouse has a left and a right button and a small wheel in the middle.

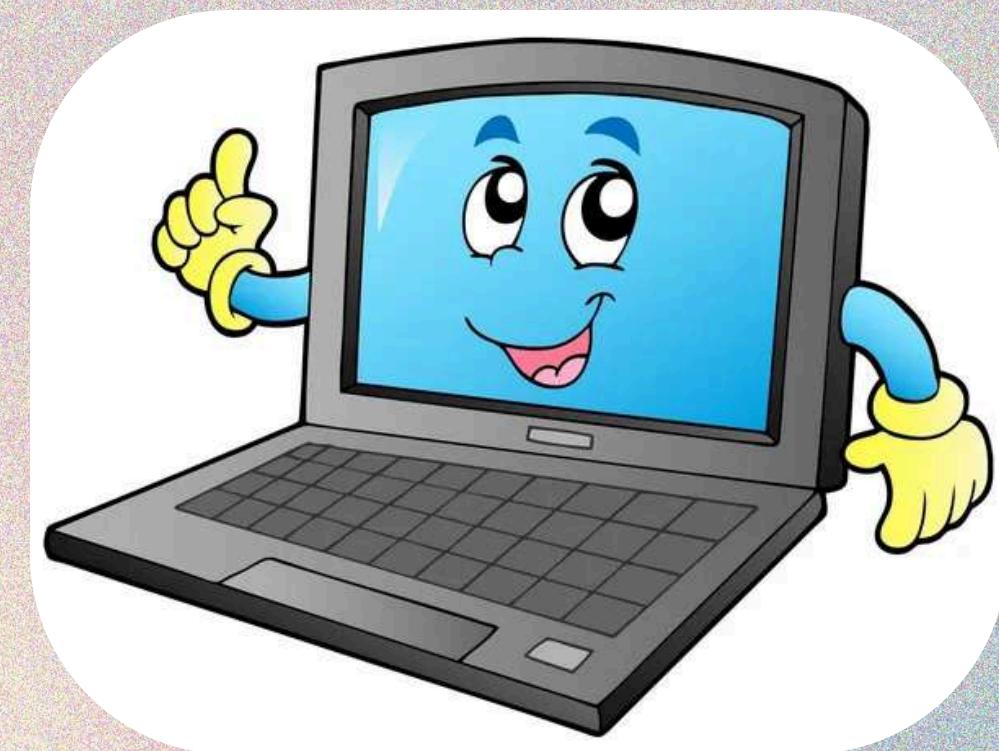

**There are several types of mouse that are in use.**

- **Mouse**
- **Wireless Mouse**
- **Touch Pad**

## **Functions of the Mouse**

**Many tasks can be performed on the computer screen with a mouse. They can be divided into following three categories.**

- **Selecting necessary items**
- **Opening necessary items**
- **Moving necessary items**

## Selecting necessary items

To do this, bring the cursor on to the item and click the left button once. Then the item is highlighted.

## Moving necessary items

Click the left button, then drag and drop it.

In addition, a mouse scroll is used to move the working window up and down. Here, a wheel in the mouse is rotated to move the page up and down.

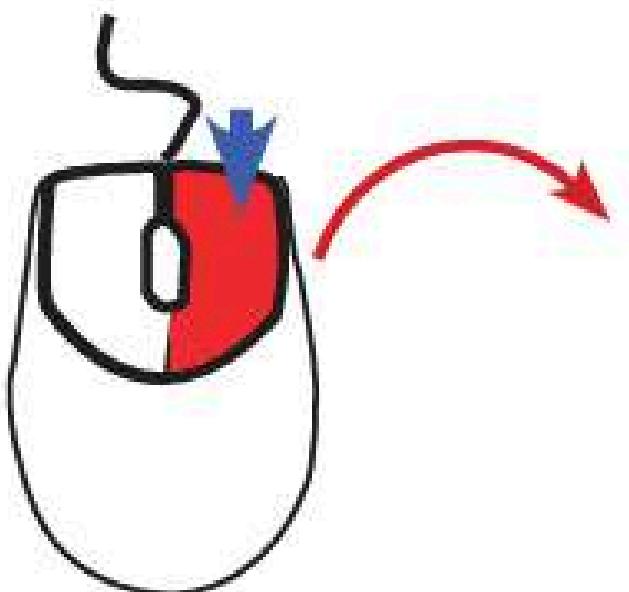

## Opening necessary items

### Method I

By double-clicking the left button, you can open the application or file that represents a corresponding icon.

### Method II

Open  
Cut  
Copy  
Paste  
Delete

Once you click the right button on the icon, select the 'open' command from the sub menu.

# KEYBOARD

There are various keyboards such as ,

- 1.Keyboard
2. Wireless Keyboard
- 3.Touch Keyboard

**1.Keyboard**

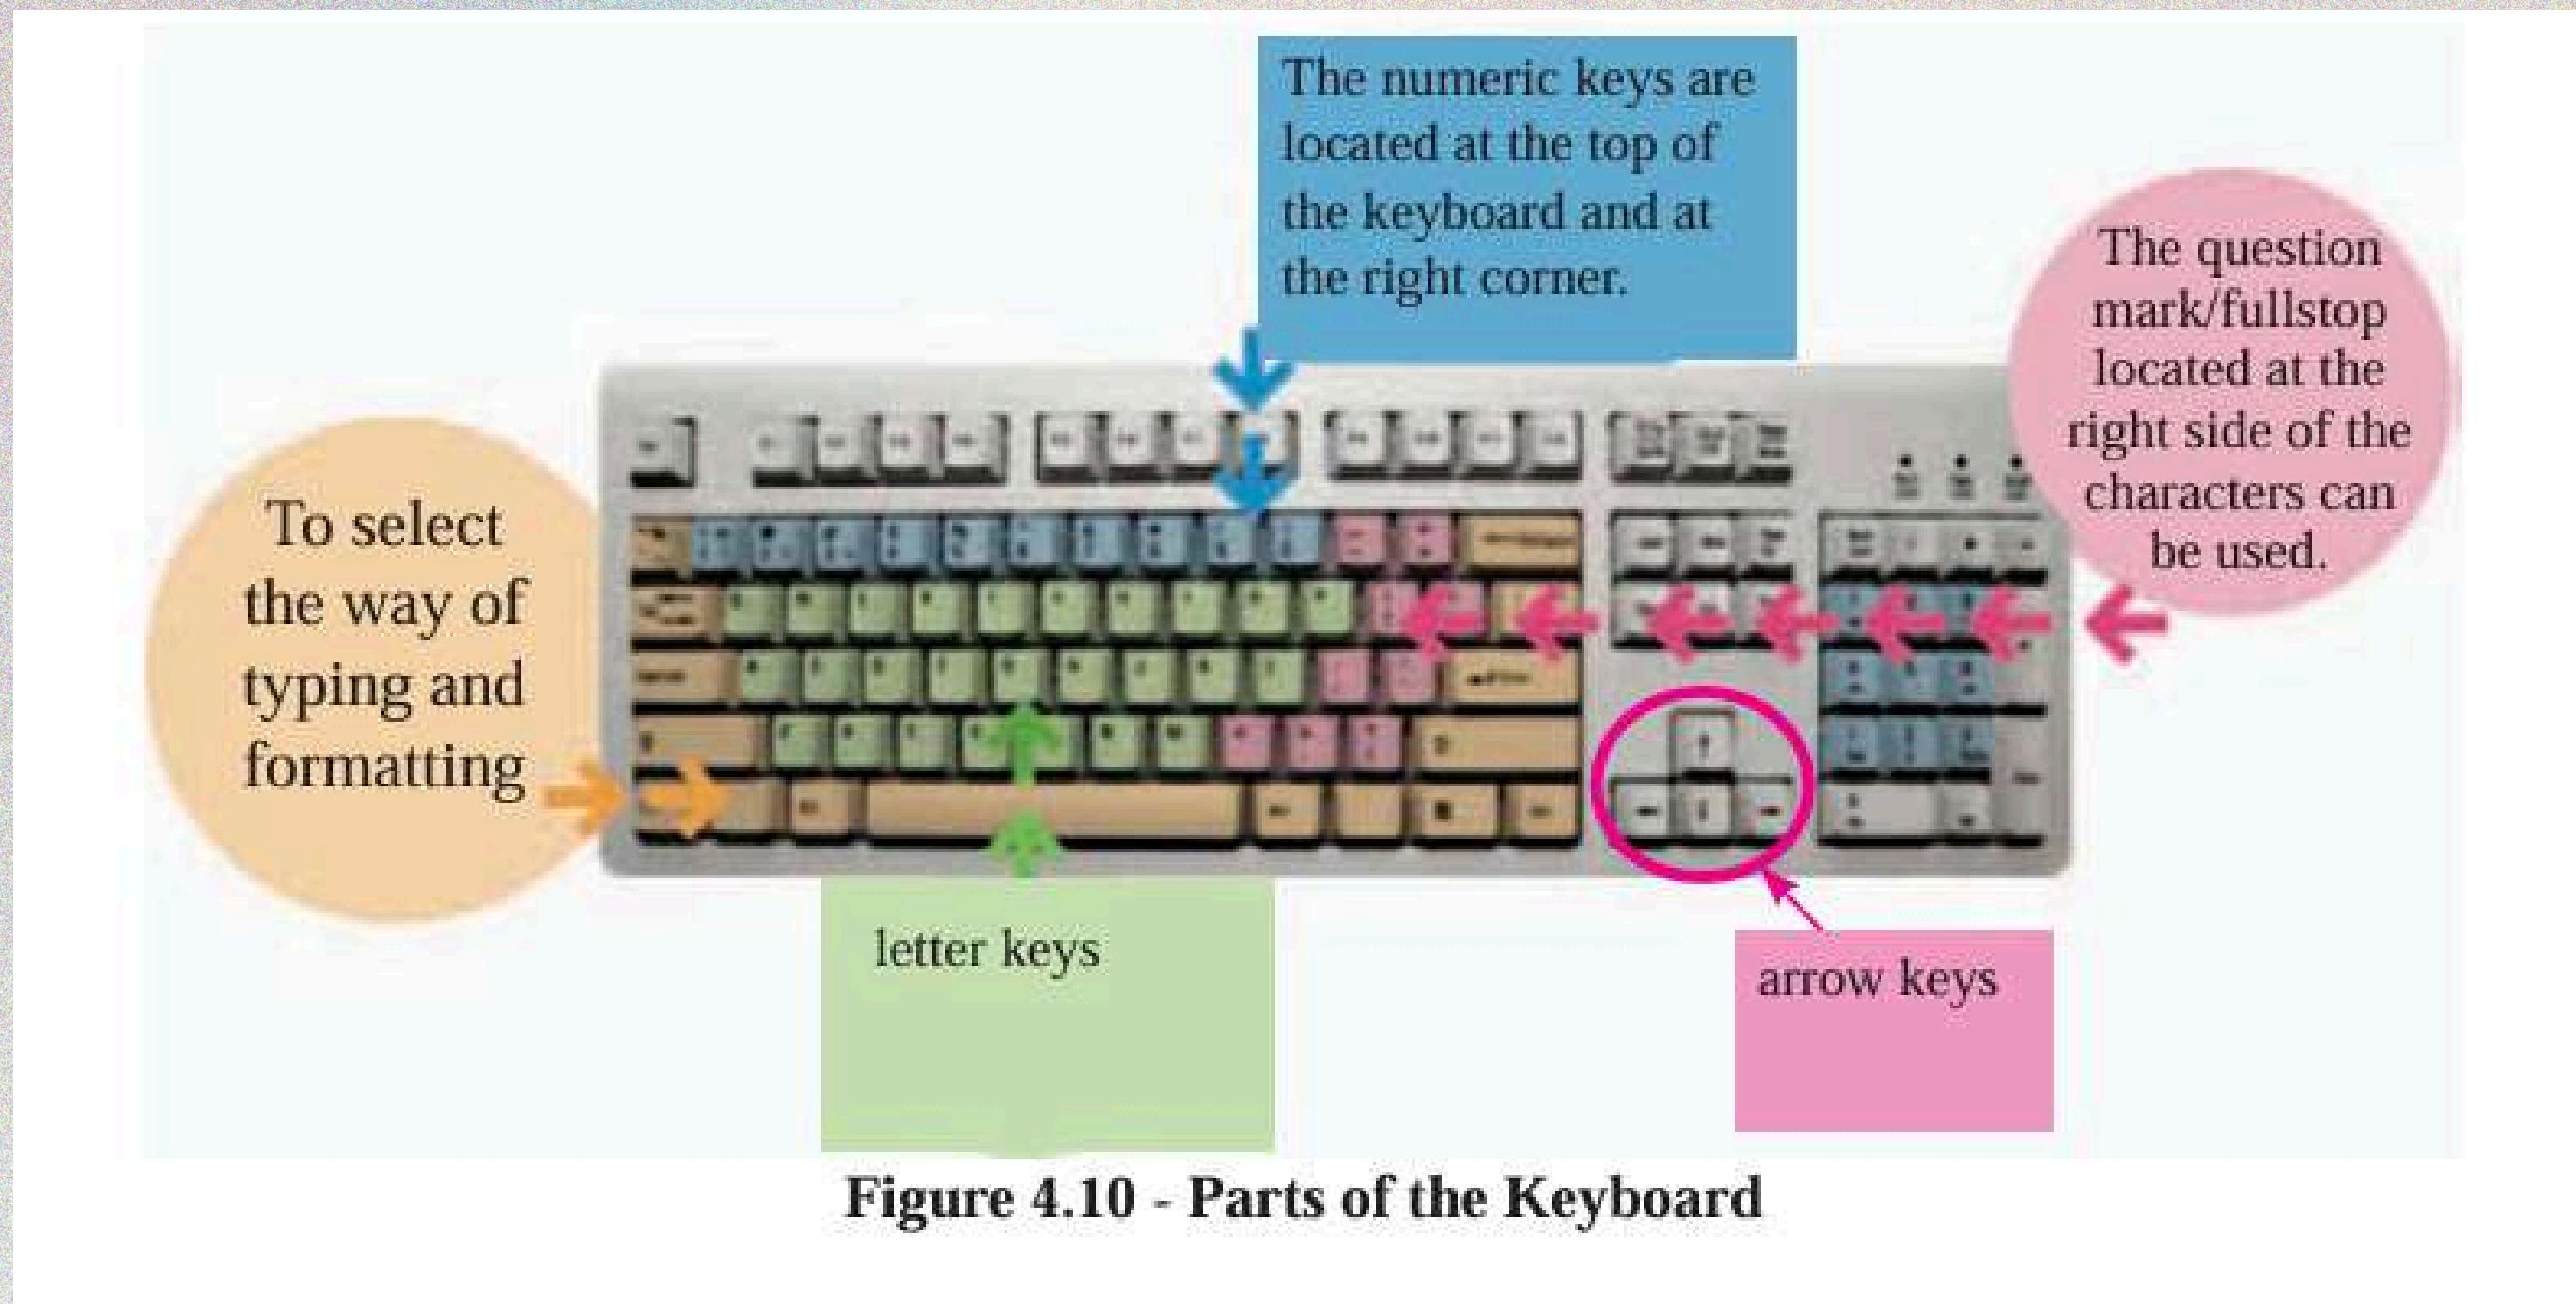

**2. Wireless Keyboard**

**3.Touch Keyboard**

# TYPES OF KEYS IN THE KEYBOARD AND THEIR FUNCTIONS

## Keyboard – Basic Keys

Cursor:

A small vertical blinking line showing **where text will appear when you type.**

Letter Keys:

Used to type letters. They are arranged in a **QWERTY** layout, not in A–Z order.

Caps Lock Key:

Press once → All letters type in **capital** (A, B, C).

Press again → Return to **small letters** (a, b, c).

Shift Key:

When letter keys are pressed while pressing on the shift key, **letters are typed in capital letters.**

Example: Shift + A → A

Similarly, while pressing the Shift key, if you press other keys, the **symbol at the top of the key is typed.**

Example: Shift +? → ?

**Space Bar:** Used to insert spaces between words.

Press once → one space

Press twice → two spaces

Example: Press once → Thank You

Press twice → Thank You

**Tab Key:** Used to insert a large space between words.

Press once → one large space

Press twice → two large spaces

Example: Press once → Thank You

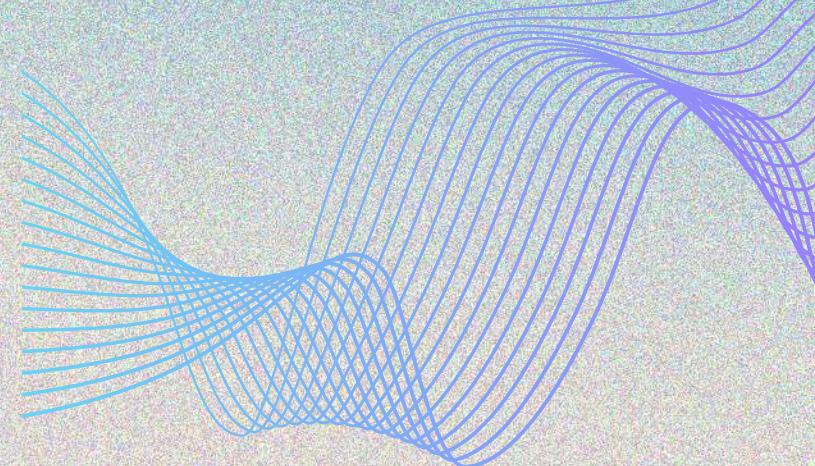

Press twice → Thank              You

**Enter Key:** Moves the cursor to the next line.

Eg: - Pressing once Thank  
You

# ***Let's use the Keyboard Correctly***

- When we fail to use the keyboard correctly, it will cause inconvenience and pain in fingers as well as in the wrists.
- The way you should keep your fingers on the keyboard is shown below.

# THANK YOU!
